

AVBA is delighted to announce
the acceptance of **a new distribution**

a world-class **Atomic Force Microscopes** company

Playing a critical role in the development of AFM technology,
Park Systems has remained the leading innovator in nano-scale
microscopy and

metrology throughout
its 25-year-history and
continues to invest in the
development of new
emerging technologies.

Park Systems offers a
complete range of products
for researchers and industry

engineers in chemistry, materials, physics, life sciences, semiconductor
and data storage industries.

Park Systems' comprehensive AFM product line provides users unparalleled
accuracy while delivering ultra-high-resolution measurements with extreme
precision and cutting-edge automation.

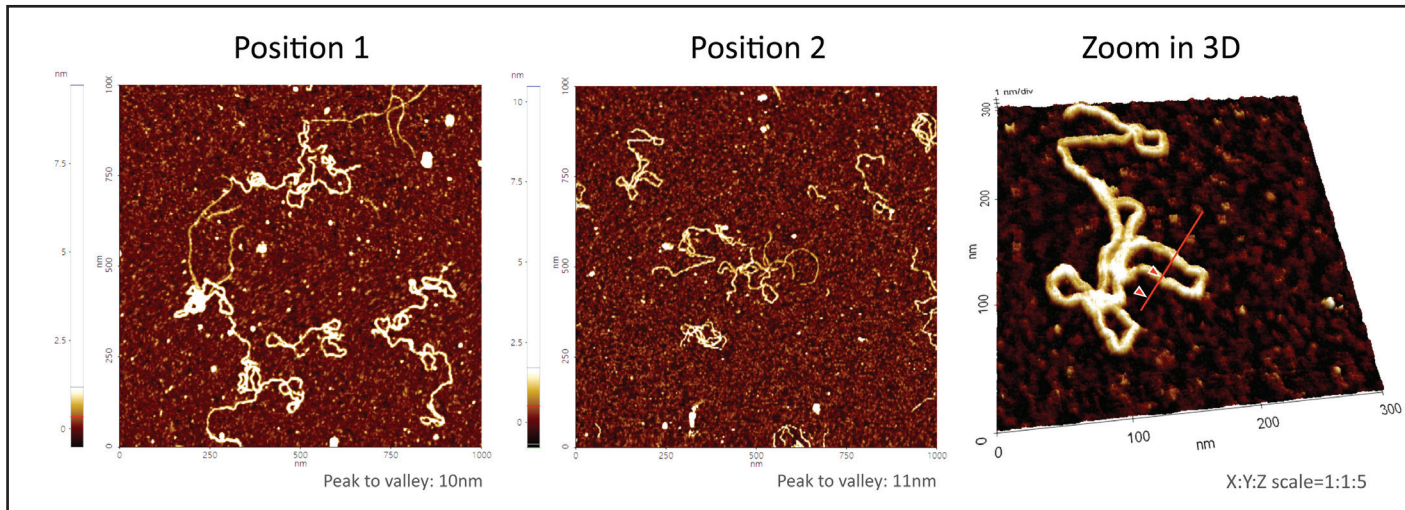

Matching your needs precisely

AVBA Hi-Tech Services Ltd | 04-6449000 | www.avba.co.il

An improved insight of **Nano-scale features**

Real time with high resolution height imaging **Atomic Force Microscopy** by **PARK SYSTEMS**

- Non image distortion
- Non-contact mode: no sample damaging or wearing out the probe
- No need for prior knowledge or trained users
- Nano-mechanical mode: at least 100 times faster than traditional techniques
